-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 06-18-07 and 08-13-07 have been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26-28 and 32-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Omurtag, et al.-6132437.

Omurtag discloses a stereotactic frame having a frame 22 which has waves or curves near its ends, and 3 fiducial markers 30,32,582. The frame has a nasion relator portion 58 for supporting the frame upon the nose region. A supporting element 23,24,28 helps to support the frame about the head of the patient. An image scan is taken to determine the position of the fame relative to the patient's anatomy and then the surgeon performs a diagnosis and procedure on the patient. The frame is capable of being placed outside the patients filed of vision if a member were placed under the eyes and above the frame keeping the patient from seeing the frame.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29-31 and 37-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Omurtag, et al.-6132437 in view of Carol-5207688.

Omurtag discloses the invention as claimed with the exception of the nasion support having a compliant material and is replaceable, or that the frame extends frontally below the eyes of the patient.

Carol discloses that it was known to use a nasion support of conformable material. It would have been obvious to have used a conformable nasion support on Omurtag's device, as this would be more comfortable and would better produce a stable and reproducible consistent placement of the frame in the same location on the patient time and time again. As "below" is a term relative to gravity, the examiner contends that depending on the placement of the nasion support relative to the patient's nose, and depending on the orientation of the patient relative to gravity, depending on the use of the ear supports and depending on the location of interest within the patient's brain, that placing the frame such that it is "below" the patient's eyes and outside the field of view of the patient would occur if the location of interest were in the front of the head, and the frame pivoted downward to accommodate the tool holder bracket 21 being in a more forward position..

Response to Arguments

Applicant's arguments with respect to claims 26-47 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K. Dawson whose telephone number is 571-272-4694. The examiner can normally be reached on M-Th 7:30-5:00.
